PROJECTS

PediaLink — pedialink.site or pedia-link.vercel.app

A Progressive Web App for pediatric health management — built as my capstone project and deployed live. Enables parents to book appointments, track vaccinations, and message their pediatrician in real time.

- Built real-time one-to-one messaging between parents and pediatrician using live notifications
- Implemented vaccination record management with downloadable/printable history and smart search
- Built with Angular PWA, Laravel, MySQL, deployed on Hostinger and Vercel — fully installable and offline-capable

Inventory Management System — inventory-laravel-inertia.pedialink.site

Full-stack inventory system for school-level asset tracking with real-time dashboard monitoring and complete item lifecycle management.

- Implemented borrowing, returns, damage reporting, repair tracking, and overdue detection
- Added Excel report generation and multi-level item organization for administrative workflows
- Built with Laravel, Inertia.js, and Vue.js
